Maximum Horsepower	150hp
Maximum Persons	6
Draft	6" to 8"
Fuel Capacity	40gal
Weight	1,800 lbs

All Figures are Subject to Variance

THE FLATS BOAT WITH UNMATCHED STABILITY AND ROOM TO FISH

Traditional skiffs are great if you don't eat cheeseburgers, never carry more than one person and don't run through chop.....but that's not much fun is it?

That's why we build the Back Country 18™. It's a flats boat that out performs and out fishes its toothpick-looking counterparts, all while delivering greater carrying capacity and superior stability.

The secret is the Back Country 18's air entrapment hull. The proprietary design allows the boat to start on top of the water and stay there in order to deliver class-leading ride, maneuverability and performance. If you want to get to the flats faster, drier and more comfortably, this is your boat.

IPB DIFFERENCE

INDIVIDUALITY

Because IPB boats have many options, owners can personalize their boat to suit their specific needs.

CONVEIENT ACCESS

All IPB boats are rigged with marine-grade copper-tinned wiring tied to marine grade switches. Wires are routed neatly to create more room in compartments and make it easy to add electrical options in the future, as well as to diagnose electronics failures should they occur. Critical junctions are tied together with water-resistant quick-connectors.

LASTING VALUE

One look at NADA™ confirms that the decision to invest in an IPB boat is rewarded with superior long-term value and decreased depreciation.

TECHNOLOGICALLY ADVANCED, ULTRA QUIET AND ECONOMICAL

Whether you like stalking fish on the flats or navigating bay and coastal waterways, Inshore Power Boats (IPB) has your dream boat. Designed by anglers and for anglers, our boats ensure fishability in the real world. Modern and ergonomic features, combined with economical pricing makes the IPB line a favorite of the value conscious fisherman. Our use of modern materials yields lighter, stronger, shallower, faster and more efficient boats. With models ranging from 14 to 21 feet, we're sure to have a boat that's right for you. We invite you to put one of our hand-crafted fishing machines to the test.
